

200SL

The Axon EZ-Seal 200SL heat shrinkable sleeve labeling system is an economical solution for sleeve labeling and tamper evident banding. This sleeve labeler accommodates product diameter from 1.25" to 4.75".

Options

- Dual reel film unwind stand
- NEMA 4X electrical enclosure
- Film presence detection/rejection systems
- Shrink systems-steam, infrared, and convection
- NRTL inspection
- Vertical, horizontal and t-style perforations
- UL certified electrical panels
- Conveyor options
- Custom material handling systems
- Customized factory acceptance testing

Features & Benefits

- **Allen Bradley Controls** - State-of-the-art technology with worldwide support capabilities
- **Open Construction** - Easy to maintain and clean
- **Machine Status Light Stack** - Provides visual verification of machine status
- **Stepper Drive for Film Feed** - Provides accurate film feed lengths at high speeds
- **Print Registration** - Allows processing of print registered films
- **Product Separation & Timing System** - Provides consistent product spacing for efficient operation
- **Stainless Steel with Aluminum Extrusion Construction** - Allows machine to operate in most production environments
- **Touchscreen HMI** - User-friendly means of machine control
