

ST-2650 STRETCH SLEEVE APPLICATOR

Introducing the new Axon ST-2650 Stretch Sleeve Label Applicator, designed for improved service, maintenance and operation! The ST-2650 is fast, running up to 80 containers per minute, and is easy to operate with only two user inputs.

Features & Benefits

- **Servo Driven** - 3-axis servo driven machine
- **Fast** - Speeds up to 80 containers per minute
- **Low Maintenance** - 3-month maintenance cycle with automatic service notifications
- **Ease of Use** - Color touch screen interface with simple user inputs enable recipe-free operation
- **Multi-Language** - English or Spanish
- **Quick Changeovers** - Easy access to components
- **Network Connectivity** - Ethernet is standard on machines
- **Accurate Records** - Total machine cycle count and shift cycle count maintained even through power outages
- **Adjustment Free Label Placement** - Speed changes and label height are easy to adjust with no need to stop machine
- **Enhanced Safety Features** - Machine continues to cycle through “dry runs” if no containers are in line as a warning to others that machine is still in use
- **Control Reliable Safety Circuits** - Redundant and meet all OSHA standards

Improved Maintenance

- 3-month maintenance cycle represents 200% improvement
- All valves and sensors run to field wiring blocks which makes it easier to service with no need to open electrical cabinets to replace components
- All sensors and valves are now quick connect with no splicing, no wiring involved
- Industrial rated connectors are much more robust, faster and easier to service with less cost
- Automatic service notifications
- Fault history and input/output status is available from Operator Interface
